Summary

Passionate front-end developer with a strong foundation in HTML, CSS, SCSS, and JavaScript, and expertise in modern frameworks and libraries, including React, Next.js, Bootstrap, jQuery, TailwindCSS, and DaisyUI. Skilled in building responsive, visually appealing, and user-friendly web applications with a focus on high-quality solutions and attention to detail. Solid understanding of web development principles, enabling seamless collaboration with designers, back-end developers, and other stakeholders to bring projects to life.

Education

Emile Academy International

Secondary Education (10th Grade)   *GPA: 3.80*

Global School of Science (2022 - 2024**)**

Computer Science (+2)   *GPA: 3.64*

Skills

Web Technologies : HTML, CSS ,SCASS Bootstrap , Tailwind , JavaScript ,jQuery, React Js,Next Js,DaisyUi ,ShadcnUi,AcertnityUi,nodejs,express,mongodb,C++,C,wordpress

Tools : Git/GitHub, , VS Code

Projects

Portfolio |(NextJs,AcetrnityUi) *Live | Git*
Developed a personal portfolio using Next.js and Aternity UI, ensuring it is fully responsive. The portfolio showcases my skills and projects in a visually appealing manner, adapting seamlessly to various screen sizes. This approach enhances user experience, making it easy for visitors to navigate and explore my work.

Herne | (Nextjs,ShadCnUi) Live | Git
Herne is a movie website built with Next.js and Shadcn, utilizing the TMDB API for dynamic content rendering. Users can search for movies, TV shows, and individuals, as well as watch trailers for both films and series. This interactive platform enhances the movie-watching experience with its userfriendly features.

Global Notes | (Wordpress) Live
I contributed to the **Global Notes** project, a digital platform providing Class 11 & 12 students with easy access to study materials across various subjects. I collaborated with educators to curate and update notes, summaries, and resources, ensuring they were accurate and aligned with curriculum standards.

Additionally, I helped optimize the platform's user experience, making it intuitive and accessible to students globally, fostering independent learning and academic success

Todo-App | (Nextjs,tailwind,mongodb) | *Git*

Built a fully responsive Todo App using **Next.js**, **MongoDB**, and **Tailwind CSS**, with dynamic task handling, real-time updates via **SWR**, and intuitive UI for seamless task management.

Nepali Bazaar | (Made on NextJs) | Live | *Git*

Nepali Bazaar Ecommerce website is a modern and reimagine website which shows the Nepali feeling. This dynamic platform built with Next.js, a popular React framework. The website provides a seamless shopping experience with key functionalities including product browsing, cart management, and billing. For the State management Context Api is use and the cart items are store in local storage as well.

Other Projects:

Weather App | Live
Quiz App
Tic-tac-Toe | *Git*
Currency-converter | *Git* || Live
Meme Generator | *Git*
Url-shortener | *Git*
Discord Bot | *Git*
BaniHerma | Git || Live
